The Fall Arboretum is a valued asset to Illinois State University. It provides both a beautiful location to visit and is also a functional outdoor tree and plant therapy for academics and students. The goal is to provide the university and public with an environment conducive to learning, teaching, and demonstrating the importance of trees, woody plants, and landscapes of intrinsic beauty. We aim to accomplish this by utilizing best practices as they apply to horticulture, botany, horticulture, and agricultural science. To do so, Illinois State University will be recognized as a leader in creating and maintaining a respected and diverse arboretum.
