ILLINOIS STATE UNIVERSITY
ARBORETUM MAP

The Arboretum is a valued asset at Illinois State University. It provides both a beautiful location to visit and a functioning outdoor lab and library for students and visitors. The goal is to provide the University and public with an environment conducive to learning, teaching and demonstrating the importance of trees, woody plants and landscapes of Illinois beauty. We aim to accomplish this by utilizing best practices as they apply to horticulture, botany, biology and agriculture. In doing so, Illinois State University will be recognized as a leader in creating and maintaining a respected and diverse arboretum.
